

The zionists are preparing to finish the genocide they started in Palestine. "Every child, every baby in Gaza is an enemy. ...We must occupy Gaza, settle it, and not a single child should remain."[1] 14,000 Palestinian babies in the Gaza extermination camp face imminent death by starvation. The occupying israelis have blocked all aid shipments for over two months, allowing only 5 trucks, less than 1% of the desperately needed aid, to pass into Gaza.

Up to half of this "aid" has been in the form of shrouds for Palestinian dead, and the remainder has not been distributed. No food or supplies have reached the population since the 2nd of March. Almost everyone inside Gaza is suffering from severe malnutrition, with disease rampant and medical services overwhelmed and under constant bombardment. Over 3,000 people have died in the past two months. Ninety-eight people were killed on Tuesday this week.

They aren't sending aid.

They're sending tanks.

## EMERGENCY MESSAGE

Zionists  
Begin  
Last  
Stage of  
Genocide

A comprehensive invasion is currently ethnically cleansing the strip from north to south. The zionists have established increasingly shrinking "humanitarian zones," outside of which Palestinians are killed on sight, and have forced the nearly 2 million surviving Palestinians in Gaza into highly concentrated "refugee camps" in the south. The zionist state regularly bombs these refugee camps, resulting in horrific casualties. Since the 15th of May, the 77th anniversary of the 1948 Nakba, israel's bombardment of the surviving population of Gaza has intensified to unprecedented levels. Around 100 people are being killed every day by the relentless bombings.

Every leading scholar on genocide worldwide is calling this what it is, but the mainstream media refuses to report accurately on conditions in Gaza. They refuse to admit that this is an intentionally targeted genocide, being waged with our tax dollars, our "defense" industry, and our complicity. Instead they are under standing orders to continue to run PR for the genocidal zionist occupation of Palestine. The world's governments continue to make symbolic gestures, denouncing the occupation's actions in words while continuing to support it in practice.

The United States is the primary beneficiary and driver of this zionist atrocity; all pressure must be exerted on the United States government to cease. This genocide is U.S.-backed, U.S.-funded, and is being carried out with tactical direction from U.S. soldiers.
